PROFESSIONAL SUMMARY

Quantitative Data Analyst and Applied Mathematical Modeler with a Bachelor of Education in Mathematics (GPA 3.51/4.00) from Universitas Negeri Yogyakarta and professional credentials in DataCamp Data Analyst Associate, Google Data Analytics, and IBM Data Analyst. Brings 2+ years of verified professional experience in transactional data auditing, automated statistical reconciliation, and business intelligence. Proven track record auditing 10,000+ operational records using DBeaver SQL and MongoDB Compass at PT Depoguna Bangunan Online, reconciling multi-channel commercial transactions with 99% accuracy in Advanced Excel at PT Samala Data Arta, and engineering financial crime anomaly models (2,512 txns / 495 accounts) and econometric pipelines (103k+ txns, R\$ 16M GMV) in Python, SQL, and Power BI DAX. Combines mathematical rigor with modern data tooling to extract actionable business insights, optimize reporting pipelines, and support evidence-based executive decision-making.

TECHNICAL SKILLS

Programming & Scripting: Python (Pandas, NumPy, Scikit-Learn, Seaborn, SciPy), SQL (PostgreSQL, MySQL, DBeaver, GoogleSQL, CTEs, Window Functions, RegEx), R (ggplot2).

Business Intelligence & Dashboards: Microsoft Power BI (DAX, Power Query, Star Schema Data Modeling), Tableau Desktop & Tableau Server, Google Looker Studio.

Databases & Developer Tools: MongoDB Compass (NoSQL), Postman (REST API Validation & Endpoint Testing), Git, GitHub, Slack, Trello.

Statistical & Quantitative Modeling: Hypothesis Testing, Statistical Experimentation, Probability Distributions, Data Cleaning & Imputation (Median), OLS Regression, Time-Series Econometrics, Value-at-Risk (VaR), RFM Segmentation, ANOVA.

Spreadsheet Engineering & Governance: Advanced Microsoft Excel & Google Sheets (Power Query ETL, Dynamic Arrays, 3-Way Reconciliation, XLOOKUP, Pivot Tables, Scenario Modeling).

Languages & Collaboration: English (Written: Advanced Technical Documentation | Spoken: Structured Syncs), Indonesian (Native).

WORK EXPERIENCE

PT Depoguna Bangunan Online (DBO)

Jakarta, Indonesia

DBO Partner Jakarta — Technology Solution Division

2025 – 2026

- Architected and audited 10,000+ daily building material order transactions across partner store networks using DBeaver (SQL) and MongoDB Compass, resolving data discrepancies and preserving database schema integrity.
- Validated REST API endpoint payloads, HTTP status codes, and server response logs using Postman to identify transaction bottlenecks and ensure seamless partner system connectivity.
- Developed and maintained automated operational monitoring reports and KPI dashboards in Tableau Desktop/Server and Microsoft Excel, providing management with real-time visibility into partner order health.
- Executed cross-functional troubleshooting workflows with software engineering and operational teams via Slack and Git to document technical anomalies, track bug resolutions, and deploy workflow improvements.

PT Samala Data Arta

Jakarta, Indonesia

Data Support & Admin Sales

2023 – 2025

- Reconciled multi-channel daily sales transactions, billing statements, and inventory streams across thousands of line items in Advanced Excel (Power Query, XLOOKUP, Pivot Tables) with 99% verified data integrity.
- Streamlined monthly sales performance and commercial reporting turnaround by 40% through the development of automated data consolidation templates and macro-enabled spreadsheets.
- Administered end-to-end commercial sales documentation, generating accurate Purchase Orders (PO), Invoices, and Quotations in strict compliance with internal audit standards.
- Maintained centralized digital data archives and performed periodic variance cross-tabulations to identify operational bottlenecks and support sales management reviews.

KEY DATA PROJECTS & PORTFOLIO

Banking Anti-Fraud Detection & Transaction Surveillance

helloabimael.vercel.app

Independent Data Project (Synthetic Banking & Fraud Analytics)

SQL (PostgreSQL CTEs & Windows), Power BI, Python

- Architected an 8-point SQL anomaly detection engine analyzing 2,512 transaction records across 495 accounts using PostgreSQL CTEs and Window Functions, detecting amount surges ($>3x$), login failures (≥ 3), odd hours, rapid succession ($<5m$), and balance drains ($>70\%$).
- Engineered an explainable composite risk scoring model (0–6 score) with deterministic risk tiering (Low/Medium/High) and materialized 4 surveillance views, achieving sub-50ms query latency across 43 metropolitan locations.
- Built an interactive Power BI surveillance suite featuring 7 dedicated investigation dashboards (Executive, ATM, Branch, Online, Card Types, Behavioral, Forensic Audit) providing 5-transaction historical account profiling for AML triage.

Olist E-Commerce Payment & Logistics Analytics

helloabimael.vercel.app

Independent Data Project (Kaggle Public E-Commerce Dataset)

Python, SQL, Power BI, DAX

- Engineered an end-to-end relational data pipeline consolidating 103,886 payment records across 99,440 marketplace orders totaling R\$ 16.0M GMV using SQL, Python (Pandas/Seaborn), and Power BI.
- Formulated an econometric installment elasticity model revealing a Pearson correlation of $r = 0.37$, demonstrating that extended installments (7–10x) generate a 3.3x surge in Average Order Value (R\$ 336.44 vs R\$ 100.91).
- Diagnosed a structural 5,328-order checkout UI anomaly at 10x installments and constructed a 9-tier behavioral RFM customer segmentation model to isolate high-ticket retention opportunities.

EDUCATION

Universitas Negeri Yogyakarta (UNY)

Sleman, D.I. Yogyakarta, Indonesia

Bachelor of Education in Mathematics (S1 Pendidikan Matematika)

Graduated: 2025

- GPA: 3.51 / 4.00** (High Distinction / Sangat Memuaskan — *Applied Mathematics & Quantitative Analytics*)
- Undergraduate Research:** Conducted quantitative statistical research analyzing educational performance distributions and survey responses using SPSS, Excel, and Python (hypothesis testing, bivariate correlation, ANOVA).
- Relevant Coursework:** Applied Statistics & Probability Theory, Mathematical Modeling & Simulation, Operations Research & Optimization Methods, Linear Algebra, Multivariable Calculus, Computational Logic.

CERTIFICATIONS

- Data Analyst Associate** — DataCamp (Credential ID: DAA0012071407542 | Issued: Aug 2026) — *100% Passed Practical Exam (DA501P) in PostgreSQL, CTEs, Window Functions, and Exploratory Data Analysis*
- Google Data Analytics Professional Certificate** — Google / Coursera
- IBM Data Analyst Professional Certificate** — IBM / Coursera
- Business Analytics with Excel** — Professional Credential
- Python for Beginners & Data Structures** — Programming Competency Credential
